SUMMARY

I am a passionate Frontend Developer with a strong foundation in HTML, CSS, Bootstrap, JavaScript, React.js, Next.js, Redux, and Zustand. After working as a civil engineer in a construction company, I made a career shift driven by my passion for technology and problem-solving. I found that programming aligns more naturally with my skills, mindset, and way of thinking. My previous experience taught me how to work effectively under pressure, adapt to different work environments, and collaborate with people from diverse backgrounds. Now, I'm focused on building clean, responsive, and user-centric web applications.
